### **Questions and Answers**

1. Are the monitoring wells in the area of excavation (MW-2, MW-18D) to be abandoned prior to excavation activities or will they just get destroyed during the excavation? Is well abandonment by a SC licensed drilling contractor prior to the excavation part of this RFP?

**No, the monitoring wells in the area of excavation will not be abandoned prior to excavation activities, since they will be removed by excavation activities.**

2. Is confirmation soil sampling required at the base or sidewalls of the excavation as it progresses and/or at final excavation? If so, what frequency and types of analyses are requested?

**No, confirmation soil sampling is not required at the base or sidewalls of the excavation as it progresses or at final excavation.**

3. Is a report summarizing the remediation activities required in the RFP? If so, what should the report include -- written summary of field activities, photographs documenting the work, table summarizing field readings, lab analyses, soil disposal manifests, etc.?

**A report summarizing excavation and backfill activities is required. Please see Performance Requirement 3 for details.**

4. Does this RFP include monitoring the natural attenuation of the site following the soil removal -- i.e., soil and groundwater sampling and analysis? If so, briefly describe the required soil sampling and monitoring well sampling activities and analyses.

**No, this solicitation does not include monitoring the natural attenuation of the site.**

5. Is the soil transportation and disposal cost included in this RFP or is it only for excavation?

**The cost for soil transportation and disposal should be included in the bid.**

6. Is compaction of the backfill material by means other than backhoe or trackhoe equipment required? Any engineering compaction testing required?

**There is no specified method of backfill compaction. Please see Performance Requirement 5 for engineering compaction testing requirements.**
